Issue date: 06 Dec 2006

Carol Stream, III – Dec. 6, 2006 - M2M magazine, published by Specialty Publishing Co., has released its annual directory of the top technology and service providers in the machine-to-machine technology arena. The M2M 100 spans multiple categories, bringing vital information to those looking for machine-to-machine solutions and partners.

"This year's M2M 100 directory provides a snapshot of an emerging market and identifies the companies with the greatest impact on its direction," says Michael Jarosik, editor of M2M magazine. "The year was marked by two major themes: consolidation and maturity. Companies are delivering solutions that make it easier to adopt machine-to-machine communications and realize the technology's enormous business value."

The M2M 100 is a directory of the most important and influential machine-to-machine technology providers as determined by the editors of M2M magazine and its editorial advisory board. Companies are selected through an exhaustive selection process based on criteria including: strength and number of customer references; strength of product/service portfolio; strength of business model; establishment and active involvement in the M2M market; and growth potential. This year, more than 300 companies were considered.

The M2M 100 can be found in the 2007 M2M Sourcebook, a definitive reference guide to machine-to-machine technology. In addition to the M2M 100's look at the leaders that are shaping the space, the Sourcebook features industry data from leading analyst firms, it examines outlooks on where the M2M industry is headed, and reveals market predictions for M2M.

"The M2M 100 is the industry's definitive resource of the leaders in the machine-to-machine technology marketplace. With the help of its advisory board, M2M magazine has selected the companies that are taking a commanding role in leading the M2M charge in a host of industries by delivering best of class technology solutions," says Peggy Smedley, editorial director and founder of M2M magazine.

The companies listed on the M2M 100 this year are as follows:
